PROJECTS

Tech Service Providing Site: Developed a tech service platform using React.js, HTML, CSS, and JavaScript, integrated with an SQL database to provide users with comprehensive guidance and support for hardware and software solutions. The site features troubleshooting resources, tutorials, and technical assistance, while utilizing the database for efficient data storage and retrieval, ensuring a seamless user experience.

Farey Food ordering site: Developed "Farey," a mobile application using Flutter, with a MongoDB database and a Node.js server. The app collects data from various food delivery platforms through authorized web scraping, aggregating the best offers and deals for users. The platform provides a user-friendly interface to easily compare offers and make informed decisions on food delivery services.
